NOTE: This is a "working draft" sequence. It currently
consists of 4 contigs. Gaps between the contigs
are represented as runs of N. The order of the pieces
is balieved to be correct as given, however the sizes
tithe gaps between them are based on estimates that have
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        and
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 * This sequence will be replaced

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 A1026.1 GI:22089
Glu-1By9 gene; glutenin.
Triticum aestivum (bread wheat)
Triticum aestivum
Eukaryota; Viridiplantae; Streptophyta; Embryophyta; Tracheophyta;
Spermatophyta; Magnoliophyta; Liliopsida; Poales; Poaceae;
Pooideae; Triticae; Triticum.
1 (bases 1 to 2996)
Halford,N.G., Forde,J., Anderson,O.D., Greene,F.C. and Shewry,P.R.
The nucleotide and deduced amino acide sequences of an HWW glutenin aubunit gene from chromosome 1B of bread wheat (triticum aestivum
L.) and comparison with those of genes from chromosomes 1A and 1D
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     PLN 05-MAY-1995

Missouri, Columbia, MO 65211, USA
If you are interested in getting corresponding physical clones,
these are publicly available from ZmDB and may be found by BLAST
searching at MSL, maizemap.org; ZmDB, www.zmdb.iastate.edu; TIGR,
www.tigr.org; or NCBI, www.ncbi.nlm.nih.gov. When the source of the
maize cDNA sequences is either Virginia Walbot, Stanford or Pat
Schnable, Iowa State, then clones may be requested from ZmDB:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           GlnGlnLeuGlnAspValSerArgGluCysArgCysAlaAlalleArgSerMetValArg 100

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                   1 MAKIAAAAAALCFAALVAV........MMCRLSEPQECSIFSGGDQY 206

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                      950

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        The present sequence represents the 5'-terminal region of the barley D-hordein gene. The present invention describes gene expression D-hordein gene. The present invention describes gene expression cregulatory DNA which comprises a promoter region derived from the barley (Hordeum vulgare) D-hordein gene which allows expression of a dealred structural gene, and a regulatory region regulatory cassettes containing the gene expression regulatory DNA (either directly or via expression vectors) enables the expression of a gene within a plant cell e.g. barley to be controlled. The use of activating and suppressing cegions in the regulatory DNA allows control of expression by e.g. tissue type or developmental stage, whilst huse of only an activating region maintains expression at a high level, providing an effective production means when recovery of the product of the structural gene is greduction means when recovery of the product of the structural gene is production means when recovery of the product of the structural gene is greducting seed endosperm tissue or regeneratable plant cells (e.g. derived from anthers) to improve seeds of barley or other plants, to produce gene products in seeds or to contribute to plant breeding programmes. The expression regulatory DNA can also used in expression systems in the expression regulatory ball and also the promoter region was 1.5 times below the product of the product region main promoter region was 1.5 times below the product of the product of the product region product region product region was 1.5 times below the plant of the product of the product region was 1.5 times the product of the product of the product region product region product region product region product region product region product region product region product region product region product region product region product region product region product region product region product region product region product region product region product region product region product region product region product region pro

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    227
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      GTCGCCTCAGCCAGGTCGTGAGGCAATACGAGCAGCAAACCGAGGTGCCATCCAAGGGA 347
                                                                                                                                                                                                                                                                                                                                                                                                                               This invention relates to barley having a low gel protein content. The barley is transformed with a polynucleotide sequence which regulated the formation of D-hordein. Transformation results in the production of barley strains with improved malting properties such as wort filterability and efficiency of extraction. The present sequence represents cDNA involved in the regulation of D-hordein production.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Barley; gel protein; D-hordein; malt; wort filterability; extraction; 88.

                                                                                          This invention relates to barley having a low gel protein content. The barley is transformed with a polynucleotide sequence which regulated the formation of D-hordein. Transformation results in the production of barley strains with improved malting properties such as wort filterability and efficiency of extraction. The present sequence répresents cDNA involved in the regulation of D-hordein production.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                colon cancer; breast cancer; lung cancer; pancreatic cancer; hepatocellular carcinoma; kidney cancer; melanoma; hepatic metastasis;

non-coding regions of RNAs corresponding to target genes, gene initiation codons, genemic flanking regions, intron-exon borders, the conditions and all segments of RNAs encoding proteins associated with one regions and all segments of RNAs encoding proteins associated with one or more diseases, conditions or mixtures. The antisense oligonucleotides corresponding to the conditions of a mixtures. The antisense oligonucleotides (appecifically AAX55272-74) can be used for the conditions are those associated with impaired respiration and conditions. Typical diseases and conditions are those associated with impaired respiration and condition, including lung diseases, pulmonary vasoconstriction, including lung diseases, pulmonary vasoconstriction, crepiration, raspiratory distress syndrome, pain, cystic fibrosis, culmonary hypertension, pulmonary vasoconstriction, emphysema, chronic obstructive pulmonary disease (COPD), and cancers such as leukemias, lymphomas, arctionems e.g. colon cancer, breast cancer, lung ancert, melanoma, partic metastases, as well as all types of cancers which may metastasize hepatic metastasize as a large of cancers which may metastasize
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             108383 CCSNNNDNNGGCGGGGGCGCGCGCCTGGCTCGCSNNNDNNGGCGGGGGCGCGCGCGCC 108442
